Important assets can be tracked by Garrison™ Tags.

Application—Wireless Asset Tracking

With our Garrison™ Evaluation Kit, assets can be tracked at all times to avoid losses. Active Tags in the Garrison™ series have replaceable batteries and a reading distance of up to 50m with our Empress™ Active Readers. The tag ID of the tags which are constantly sent to the reader helps locate the asset items conveniently. Alarms could also be set for unauthorized removal of the Garrison™ Responsive Tag. Valuable assets, sensitive documents, and important property can now be protected properly.
