Hussar™ Tag as key fob for convenient people tracking.

Application—Wireless People Tracking

With our Hussar™ Evaluation Kit, any application requiring tracking of people can be implemented with ease. Active Tags in the Hussar™ series have replaceable batteries and a reading distance of up to 50m with our Empress™ Active Readers. The tag IDs constantly sent to the reader helps locate the person conveniently. Students, elderly, children, company staff and event participants can all be tracked using Hussar™ tags.
